ABSTRACT

Industrial training is an important phase of a student life. A well planned, properly executed and evaluated industrial training helps a lot in developinga professional attitude. It develops an awareness of industrial approach to problem solving, based on a broad understanding of process and mode of operation of organization.

The aim and motivation of this industrial training is to receive discipline, skills, teamwork and technical knowledge through a proper training environment, which will help me, as a student in the field of Computer Engineering, to develop a responsiveness of the self-disciplinary nature ofproblems.

During a period of 12 weeks of training at Tatvasoft., I was assigned as a technical supporter in order to help the company in the field of Analytics. Throughout this industrial training, I have been learned new technology such as Asp.net core, Ms Sql Server. I also learn about Mvc project structure& coding standard of industry.   I'm also able to implement what I have learnt for the past year as a Information technology student in Chandubhai S. Patel Institute of technology college.
